*Iron Craftsmen Since the Civil War*

# PLATE NO. 1

# *Ornamental Cast Iron*

Steeped in the glamour and tradition of the old south, cast iron verandas by HINDERER'S IRON WORKS have graced the plantation homes and town houses of the most discriminating since the early days of the war between the states.

The best in tradition and design of old New Orleans cast iron lace work, is embodied in the patterns illustrated on the succeeding plates. These designs are not copies or adaptations of nineteenth century iron work, but are produced from original patterns, many of which have been in our possession for over half a century.

Today we are making cast iron lace work of a character that has appealed to the taste of a critical clientele for more than seventy-five years. Slaves no longer tend the forges, but the same attention to detail that has made the old iron verandas of New Orleans justly famous, is still apparent in our work.

Years of effort have resulted in the accumulation of what we believe to be the best and most complete collection of cast iron veranda patterns available today. Experience has proved that the adaptation of these patterns to modern architectural design is both practical and effective; and it is with the hope of preserving a truly American contribution to architecture, that we present our portfolio of ornamental cast iron.

## *Cast Iron Garden Furniture*

BY

HINDERER'S IRON WORKS

The above illustration is typical of the more than one hundred and forty designs of cast iron garden furniture and lawn requisites illustrated in our catalog No. 39. This furniture was created and designed for use in Southern gardens where outdoor living is a year 'round possibility. It is impervious to weather and the variety and beauty of these exclusive patterns lend a distinctive touch to any surroundings. Copies of catalog No. 39 with accompanying price list gladly furnished on request.

*Iron Craftsmen Since The Civil War*

# PLATE NO. 3

# Cast Iron Lace Work

One of many streets in the "Vieux Carré", showing a wealth of cast iron lace work that is the proud heritage of New Orleans.

In the foreground is an early example of a cast iron veranda embodying HINDERER'S acorn design. Pattern No. 105 was used for pilasters and lintels. The railing design is our No. 24 with cluster. Brackets are No. 179 and fringe under lower lintel is our No. 177.

In the left foreground is an example of a combination of cast iron panel inserts used to relieve the severity of a plain wrought iron railing; HINDERER'S pattern No. 140.

These patterns and many more of unusual beauty are fully illustrated in the accompanying plates.

*Iron Craftsmen Since The Civil War*

# PLATE NO. 5

The patterns illustrated on the plates contained in this folder are subject to treatment, limited only by the size of the particular castings. We have successfully introduced the use of "Cast Iron Lace Work" in such items as gazabos or summer houses, crestings on garden walls, window grilles, flower pot holders, porte cochères, roof finials, lawn guards, door grilles, as well as the original use in railings and verandas.

Prices are based on furnishing material completely fabricated, match marked, painted with one prime coat paint, and packed for shipment. We are prepared to submit working details of any particular project along with quotations. Our terms are invariably as follows: 25 percent of total price with order, 50 percent, C. O. D. by draft attached to bill of lading, and balance upon architect's acceptance of work.

We sell castings, only to ornamental iron workers, and the prices will vary with the quantity of each pattern required on a single order. Terms for sale of castings are, 25% of total price with order, balance C. O. D. by draft attached to bill of lading. Quotations for castings only, will be submitted on request accompanied by architect's details of contemplated project.
